**TITLE:** What Can a Historian Do with AstroGen?

Abstract (2,250 Maximum Characters): "Astrogen", the Astronomy Genealogy Project, is in the development stage. Patterned after the Mathematics Genealogy Project at http://genealogy.math.ndsu.nodak.edu, it will eventually include most of the world's astronomers, past and present, and provide information about their years of life, highest degrees, universities, and thesis titles. There will also be links to online theses, home pages, and obituaries when these are available. Although a few details remain to be worked out before it becomes public, it is possible to make some use of what has already been compiled. I will give an example, comparing graduates of Harvard University, the University of California at Berkeley, and the University of Chicago from different decades, with information about their professional careers and publication records. The author welcomes queries about AstroGen and is seeking more participants.

**PRESENTATION TYPE:** History and Education

**CURRENT * SESSION TYPE:** History/Education Oral Session

**CURRENT * CATEGORY:** 74. History

**H&E Secondary Category Selection:** 74. History

**AUTHORS (FIRST NAME, LAST NAME):** Joseph S. Tenn

**INSTITUTIONS (ALL):** 1. Sonoma State Univ., Rohnert Park, CA, United States.
